NOTES TO THE CONDUCTOR

General Articulation Information:

Staccato notes are generally very short and accented, with a clean attack, but not too short or clipped.

Rooftop or *marcato* accents are detached and accented—think “daht.”

Quarter notes with no articulations are generally long and full value.

General Notes:

This arrangement has a recurring vamp section that is in the style of Stan Kenton’s “Intermission Riff.” The vamp (a two-beat feel) gets introduced by the rhythm section in the intro, and continues under the melody at m. 9. I recommend the director and the students listen to the Stan Kenton recording to capture the sound and style. At m. 23 the melody continues, but the rhythm section goes into a straight-ahead swing feel in “4” with the drums playing a swing pattern on the ride cymbal, and the bass walking a quarter-note bass line. From there, the chart will return to the two-beat vamp. This occurs at mm. 19–22, mm. 33–36, mm. 55–62 with a two-bar “Intermission Riff”-style send off for the solo section, and mm. 109–116. After another send off and a four-measure drum solo at m. 119, the vamp gives way to a horn soli section followed by a shout section at m. 147.

Rhythm Section:

Switching between two-beat feel and $\frac{4}{4}$ swing will be essential. The contrast will be most apparent in the drums. Generally, drums play the open/closed hi-hat pattern during the two-beat feel, with an emphasis on beats 1 and 3, and a more driving swing pattern on the ride cymbal for the $\frac{4}{4}$ swing, with an emphasis on beats 2 and 4.

For the bass, use a similar approach by playing quarter notes on beats 1 and 3 for the two-beat feel, and walking quarter notes for the $\frac{4}{4}$ swing.

The piano has the syncopated rhythm during the two-beat feel that gives it that “Intermission Riff” sound.

All rhythm parts are notated with specific notes and rhythms to play.

Sections to Focus on for Rehearsal:

For the first statement of the melody at m. 9, direct the drummer to play the cross stick on beat 4 during the swing feel. Then, during the bridge at m. 37, I suggest a more open and flowing swing feel without the cross stick, and just swinging hard on the ride cymbal while continuing a strong, crisp hi-hat on beats 2 and 4.

For the last A of the melody in the horns at m. 45, the saxes and trumpets should strive for a good section blend. The top line or upper notes are the melody and should always be heard, and the harmony under it secondary. The trombone rhythmic hits should focus on blending within the section, not being too loud, and avoiding overpowering the melody.

The soli at m. 123 has three main elements: 1) the first soli line, 2) the soli counter line at m. 135, and 3) the rhythm section hits that happen throughout, creating a question/answer between the horns and rhythm. For rehearsal, begin with only drums playing a swing pattern on the hi-hat with bones/saxes so the ensemble can hear the soli line. Then, add the counter line at m. 45. Next, have the rhythm section play their parts so everyone can hear the hits that fall within the soli line, and, finally, add all three elements together. Extra attention will be needed in the horns for mm. 131–132 and mm. 143–144, as the notes are a little off the beaten path.

Measure 145 again builds to a big hit on beat 1 of m. 146, sending off the shout section at m. 147. There are really two melodies happening at the same time in the shout: the original melody in unison saxes and a shout melody in the lead trumpet, which is harmonized with trumpets and bones. I suggest a reminder in the shout section about the articulation with rooftop accents detached and accented—with an attitude!

At m. 159, the second half of the shout section, the drummer can take it up a notch by adding in some bigger snare hits or cymbal crashes on beats 2 and 4. This is the climax of the chart; therefore, the entire ensemble should strive to match the rise in intensity for max impact.

Enjoy!
